

MICROLYTE 6-12 MP AGM RANGE

6/12V MONOBLOC FLAT PLATE AGM BATTERY

SEC - 6/12 - MP

info@secbattery.com / www.secbattery.com

SEC Industrial Battery Co. Ltd.

Battery Profile

DESIGN LIFE

5-8 year design life in float service @ 20°C

1.2Ah-250Ah at C/10 to 1.75Vpc at 25°C.

320 Cycles for AGM

MANUFACTURED TO COMPLY

IEC 60896-21/22-2004

BS 6290 Part 4

Eurobat

UL Component approval

ISO 9001:2000

ISO 14001:2004

APPLICATIONS

UPS Systems
Telecommunication PABX
Emergency Lighting
Fire & Security Alarm System
Portable VTR/TV
Power tools
Computer
Fans
Electronic torch
Window washer

SPECIFICATIONS

Positive electrode:	Standard Calcium Grid Pasted Plate
Negative electrode:	Calcium Grid Plate
Float Voltage:	2.25 vpc $\pm$ 1% at 20°C
Max.Charge Voltage:	2.35 vpc at 20°C
Container:	ABS grade as standard / flame retardant V-0 material as optional
Electrolyte:	Sulphuric Acid
Safety Valve:	1-3 PSI Self-Resealing
Separators:	Absorbed Glass Mat (AGM) Separator
Terminals:	Integral Copper Insert for Stainless Steel Bolt

INNOVATIVE FEATURES

Valve regulated
Propriety virgin Pure Lead Alloy
Latest plates formation technology
Maintenance Free
Increased Capacity and Cycle life
Never requires addition of water
Spill proof and leak proof
Very low gassing on float charge
Explosion proof / Increased safety
Low self-discharge
Multicell container

CAPACITY

Ampere Hour @ 25°C

Actual dimension may be $\pm 5\%$ from the figure shown.

Typical View of Female insert Terminal.

FT2 = 5 mm Female Terminal = 12mm with M5 Bolt
 FT3 = 6 mm Female Terminal = 14mm with M6 Bolt
 FT4 = 6 mm Female Terminal = 16mm with M6 Bolt
 FT5 = 8 mm Female Terminal = 16mm with M8 Bolt

MICROLYTE 6-12 MP Flat Plate AGM Batteries

SEC MICROLYTE + Plus Valve Regulated batteries are of the absorbed electrolyte type. The cells are designed so that a controlled amount of electrolyte is contained within an absorbent non woven separator material that separates the battery plates. This type of separator construction allows full wetting of the plates with the available electrolyte and also allows the passage of oxygen generated during charging. This construction is generally referred to as absorbed glass mat (AGM) type.

MICROLYTE + Plus Valve Regulated batteries are sealed with the exception of a one way valve that opens when excess pressure builds up inside the battery, the valve automatically reseals itself. The recombination of gases is accomplished by allowing oxygen produced at the positive plate during charging to pass through the separator material to the negative plate where the recombination reaction occurs. The valve controls the internal pressure of the battery to optimize the efficiency of the recombination reaction and minimize the quantity of electrolyte releases as gas.

SEC Industrial Battery is a large producer of modern technology, valve regulated (sealed) batteries. In its new battery manufacturing facility it has been able to draw on a wealth of international experience and knowledge to produce a high quality, reliable lead acid battery. The continuing installation of the most modern production equipment makes continuous product improvement possible.

General Features

* Valve Regulated Construction (sealed)

The SEC valve regulated AGM rechargeable lead acid battery allows safe, trouble free operation in any position. There is never any requirement to top up electrolyte because over 99% of all gases generated in normal operation are recombined inside the battery.

* Immobilized Electrolyte

Due to the type of construction, the batteries can be shipped by sea, road or air without special handling and packing precautions. Terminals are protected from the possibility of short circuit at all times.

* Low Self Discharge

Because of the use of Lead Calcium grids batteries can be stored for long periods of time without recharge.

* Cycle or Stand-By Service

Batteries are suitable for either cycling or standby float service.

* Tough Construction

SEC MICROLYTE + Plus batteries utilize tough, high impact resistant and non-conductive ABS plastic for cases and lids. Batteries are also available in Flame retardant ABS cover and case as an option.

* Compact Design

SEC MICROLYTE + Plus batteries utilize virgin lead and the best possible raw materials to build a high energy density battery. The International design team has a policy of continuous product improvement.
